

## ESTETICA- VARIETATE DE MODELE

Radiatoarele **IMPERIAL LUX** reprezinta produsul cu o inalta estetica, fiind si primele in topul calitatii.

Varietatea de modele, finalizate cu albul stralucitor RAL 9010 si manopera ingrijita ofera raspunsul perfect la orice cerinta a constructorilor si arhitectilor.

Radiatoarele **IMPERIAL LUX** sunt produse in 5 inalimi(300-400-500-600-800 mm), 3 grosimi (11-22-33 mm ) si o varietate de lungi cuprinse intre 300 si 3000 mm.

## DATE TEHNICE

Radiatorul **IMPERIAL LUX** sub numele de ramura **FAVERO GROUP** sunt produse din otel de calitate (DIN 10130) cu grosimea de 1,25 mm.

Presiunea de lucru este 6 bari, fiind testata la 8 bari.

Multumita peretilor dubli din ambele parti, cu o structura cu aria pieoare speciala,productiva, prin care circula apa, radiatoarele din otel garantaza un sistem de incalzire foarte economic , care concureaza cu o mare eficienta in competitia cu celealte tipuri de radiatoare de pe piata.

Radiatoarele **IMPERIAL LUX** nu sunt numai o solutie excelenta pentru traditionalele sisteme cu o teava sau doua, (care lucreaza la 90/70°C), dar sunt de asemenea recomandate si in sistemele de incalzire cu temperaturi scazute(70/55°C).

Conexiunea laterală pentru diametre de 1/2" este cu filet interior, (mama).

## AMBALARE

Radiatoarele **IMPERIAL LUX** sunt protejate de un excelent si adevarat ambalaj .

O foaie de carton acopera partile de sus si de jos si intregul radiator este protejat de o folie puternica de polietilena.

Ambalajul a fost studiat pentru a proteja radiatorul in timpul instalarii, pina la inceperea incalzirii.

## FINISARE

Radiatorul **IMPERIAL LUX** este tratat cu un sistem adevarat de fosfat solubil in apa, apoi incalzit la 180°C. conf. DIN 55900.

O vopsea epoxidica, culoarea RAL 9010, este folosita pentru finisare, care apoi este uscata in cuptor la 220°C..

## SISTEMUL DE FIXARE

Radiatorul **IMPERIAL LUX** este compatibil cu multe sisteme/supori de fixare pentru o usoara si corecta instalare pe perete sau pardosea.

## DATE TEHNICE

Radiatorul **IMPERIAL LUX** versiunea "Ventil" a fost creat pentru a satisface toate cerintele de instalare cind spatiul este redus. Este unul dintre putinetele radiatoare care are 6 fittinguri cu diametrul de 1/2" (patru laterale, iar doua la partea inferioara la 50 mm unul de altul). Poate fi instalat foarte usor in sistemele cu una sau doua tevi. Radiatorul **IMPERIAL LUX "VENTIL"** ofera 16 tipuri diferite de fittinguri ca sa satisface toate cerintele arhitecturale.

## CALITATE

Radiatorul **IMPERIAL LUX** satisface toate standardele de calitate DIN 4704; EN 442; DIN CERTCO; UNI si alte standarde internationale.

Produsele **FAVERO GROUP** sunt fabricate in conformitate cu ISO 9002 si in corelatie cu Controlul de calitate.

## IMPERIAL STANDARD

Modele Imperial standard este solutia cea mai bună intre pretul radiatorului si dimensiune, datorită suprafetei reduse a convectorului, fără a modifica in final calitatea produsului.

## AESTHETICS – WIDE RANGE OF MODELS

The **IMPERIAL LUX** panel radiator is where high aesthetic value meets top quality.

The wide range of models, the brilliant white RAL 9010 finish and the fine workmanship offer the perfect answer to every constructional and architectural requirement.

The **IMPERIAL LUX** radiator comes in 5 heights (300-400-500-600-800 mm), three depths (11-22-33) and various lengths between 300 and 3,000 mm.

## SPECIFICATIONS

The **IMPERIAL LUX** radiator under the brand name **FAVERO GROUP** is made with 1.25 mm thick top quality steel (DIN 10130).

The working pressure is 6 BAR and the test pressure is 8 BAR. (Special 10 BAR - Test 13 BAR)

Thanks to the special technical/productive double sided finned structure through which the water circulates, the steel panel radiator guarantees a heating system that is very economical to run as well as ensuring a very high efficiency compared to other types of radiators on the market.

The **IMPERIAL LUX** radiator is not only an excellent solution for traditional one-pipe or two-pipe systems (which work at 90/70°C), but is also recommended for low temperature heating systems (70/55°C). Lateral female fittings Ø 1/2".

## PACKAGING

The **IMPERIAL LUX** radiator comes protected by excellent suitable packaging. A cardboard sheet covers the lower and the upper part and the whole radiator is protected by strong polyethylene film. The packaging has been studied to protect the radiator during installation, prior to starting up the heating system.

## FINISH

The **IMPERIAL LUX** radiator is treated with a suitable hot phosphatasing system – a water-soluble primer is applied and then heated at 180° - to DIN 55900.

Epoxy powder paint, colour RAL 9010, is used for the top coat, which is baked in a stove at 220°C.

## FIXING SYSTEM

The **IMPERIAL LUX** radiator is compatible with many fixing systems/supports for easy and correct floor or wall installation.

## SPECIFICATIONS

The **IMPERIAL LUX** radiator "Ventil" version has been made to satisfy all installation requirements when space is at a premium. It is one of the few radiators that has 6 fittings with Ø 1/2" (four lateral and two at the bottom 50 mm apart). It may be very easily installed on one-pipe or two-pipe systems. The **IMPERIAL LUX "VENTIL"** radiator offers 16 different types of fittings to meet all possible architectural demands.

## QUALITY

The **IMPERIAL LUX** radiator satisfies all quality standards DIN 4704; EN 442; DIN CERTCO; UNI and other international standards.

The **FAVERO GROUP** brand is manufactured in conformity with ISO 9002 and relative quality controls.

## IMPERIAL STANDARD

Model Imperial Standard is the best solution between radiator price and dimensions due to the reduction of the surface of convectors, without to make any modification in the final quality of the radiator.

Transferul de caldura este calculat in Kcal/h cu formula  $Dt = 60 C = 90 + 70 - 20C$ .

Dacă se fixează grătarul reducerea de putere este de 5,33%.

Pentru radiatoarele imperial standard reducerea de putere este de 12%.

(Watt/h)  $\frac{90^\circ - 70^\circ}{2} - 20^\circ$
